

# Vendor Plugin Portal — Field Guide & Feature Roadmap

Oct 1, 2026 · @Vani

Two parts: this tab covers exactly what content and fields a vendor can add per product type; the second tab covers what plugin-level features exist today and how they can be improved.

## Overview

Every product a vendor lists is built from two layers: **content fields** (what the vendor fills in — images, videos, files, text) and **plugin capabilities** (what the vendor's adapter does automatically once a tenant installs — provisioning, fulfilment, licensing). The fields below drive both: they populate the marketplace listing AND get passed to the plugin's `/provision` call so the adapter has what it needs to fulfil the order.

Each table below lists, per fulfilment type: the field, whether it's required to publish, the exact format/spec, and what it enables once the plugin receives it.

## Field guide by product type

### Ecommerce & physical products — SHIP\_PHYSICAL

| Field               | Required | Format / spec                                                        | What it enables                                          |
|---------------------|----------|----------------------------------------------------------------------|----------------------------------------------------------|
| Primary image       | Yes      | 1:1 square, min 1000×1000px, JPG/PNG/WebP, max 5MB, plain background | Main marketplace listing thumbnail                       |
| Gallery images      | No       | Up to 8, same size standard                                          | Product detail carousel                                  |
| SKU                 | No       | Vendor's internal code                                               | Order routed to vendor's ERP with a matching reference   |
| Variants            | No       | e.g. Size: S/M/L, Colour                                             | Buyer selects a variant at checkout                      |
| Weight & dimensions | No       | kg, cm (L×W×H)                                                       | Live shipping cost calculation, courier label generation |

## Digital products — DELIVER\_DIGITAL

| Field               | Required | Format / spec                    | What it enables                                         |
|---------------------|----------|----------------------------------|---------------------------------------------------------|
| Preview image       | Yes      | 1:1 square, min 1000×1000px      | Listing thumbnail                                       |
| Deliverable file(s) | Yes      | Any file type                    | Pre-signed download URL generated instantly on purchase |
| License type        | No       | Personal / Commercial / Extended | Shown to buyer before purchase, enforced in terms       |

## Software products — LICENSE\_SOFTWARE

| Field                        | Required | Format / spec                          | What it enables                  |
|------------------------------|----------|----------------------------------------|----------------------------------|
| App icon                     | Yes      | Square, min 512×512px                  | Listing icon                     |
| Screenshots                  | No       | 2+ recommended, 16:9 preferred         | Product detail gallery           |
| Platform / OS compatibility  | No       | Free text, e.g. Windows 10+, macOS 12+ | Shown as a compatibility badge   |
| Installer / download package | Yes      | Any file type or URL                   | Delivered after purchase         |
| Version number               | No       | Semver, e.g. 2.4.1                     | Tracked for update notifications |

## Software & SaaS services — PROVISION\_SOFTWARE

| Field           | Required | Format / spec                  | What it enables                            |
|-----------------|----------|--------------------------------|--------------------------------------------|
| Product logo    | Yes      | Square, min 512×512px          | Listing icon                               |
| Plan tiers      | No       | Free text describing each tier | Shown as a pricing/plan comparison         |
| Onboarding flow | No       | Free text                      | Describes what happens right after install |

## Cloud & infrastructure services — PROVISION\_CLOUD

| Field             | Required | Format / spec              | What it enables                  |
|-------------------|----------|----------------------------|----------------------------------|
| Service icon      | Yes      | Square, min 512×512px      | Listing icon                     |
| Available regions | No       | e.g. ap-south-1, us-east-1 | Buyer picks a region at install  |
| Technical specs   | No       | Free text + API docs link  | Shown on the service detail page |
| Uptime SLA        | No       | e.g. 99.9% monthly         | Displayed as a trust signal      |

## LMS courses — STREAM\_LMS\_COURSE

| Field                     | Required | Format / spec                                       | What it enables                                    |
|---------------------------|----------|-----------------------------------------------------|----------------------------------------------------|
| Course thumbnail          | Yes      | 16:9, min 1280×720px, JPG/PNG/WebP, max 5MB         | Listing thumbnail                                  |
| Intro / promo video URL   | No       | YouTube / Vimeo / CDN link                          | Autoplays on the course detail page                |
| Curriculum (lessons)      | Yes      | Repeatable: title + video URL + duration per lesson | Builds the learner's lesson-by-lesson player       |
| Study material            | No       | Downloadable PDFs, slides, worksheets               | Attached to the course or per-lesson for download  |
| Instructor name & bio     | No       | Free text                                           | Shown on the course detail page                    |
| Skill level               | No       | Beginner / Intermediate / Advanced / All levels     | Filterable in marketplace search                   |
| Certificate on completion | No       | Yes / No                                            | Triggers certificate issuance on course completion |

## Multimedia & streaming services — DELIVER\_MULTIMEDIA

| Field                 | Required | Format / spec                     | What it enables   |
|-----------------------|----------|-----------------------------------|-------------------|
| Cover art / thumbnail | Yes      | 1:1 or 16:9, min 1280px long edge | Listing thumbnail |

| Field                   | Required | Format / spec                                     | What it enables                                            |
|-------------------------|----------|---------------------------------------------------|------------------------------------------------------------|
| Sample / preview URL    | No       | Short preview clip                                | Buyers evaluate before purchase                            |
| Media type              | No       | Video / Audio / Podcast series / Image collection | Determines which player the marketplace renders            |
| DRM protected           | No       | Yes / No                                          | Signals whether the plugin must issue a DRM-wrapped stream |
| Source / licensed files | No       | Any file type                                     | Delivered or streamed per the licensing terms              |

## Professional & field services — DISPATCH\_SERVICE

| Field                 | Required | Format / spec               | What it enables                       |
|-----------------------|----------|-----------------------------|---------------------------------------|
| Provider photo        | Yes      | Square, min 500×500px       | Listing thumbnail, builds buyer trust |
| Service area / radius | No       | e.g. 15km around a location | Filters which buyers can book         |
| Response time SLA     | No       | e.g. within 4 hours         | Displayed as a trust signal           |

## Appointments & sessions — BOOK\_APPOINTMENT

| Field            | Required | Format / spec                       | What it enables               |
|------------------|----------|-------------------------------------|-------------------------------|
| Profile photo    | Yes      | Square, min 500×500px               | Listing thumbnail             |
| Session duration | No       | e.g. 45 minutes                     | Sets the calendar slot length |
| Session format   | No       | Video call / In-person / Phone call | Shown to buyer before booking |
