ABOUT TENANTPLATFORM
A platform where every contributor is an owner
We are building a cloud marketplace where the people who create value — plugin authors, integration builders, and service architects — share in the rewards they generate, not just the employees of a corporation.
Create account →
Our Vision
A world where the platform is a commons — not a landlord. Every contributor who builds something that delivers value receives a proportional, automatic reward. The ecosystem grows because the people who grow it benefit directly.
Our Mission
To build a multi-tenant cloud platform where any individual, team, or organization can publish technical services — plugins, integrations, and offerings — and earn a fair, transparent share of the revenue they generate, governed by code and not by corporate hierarchy.

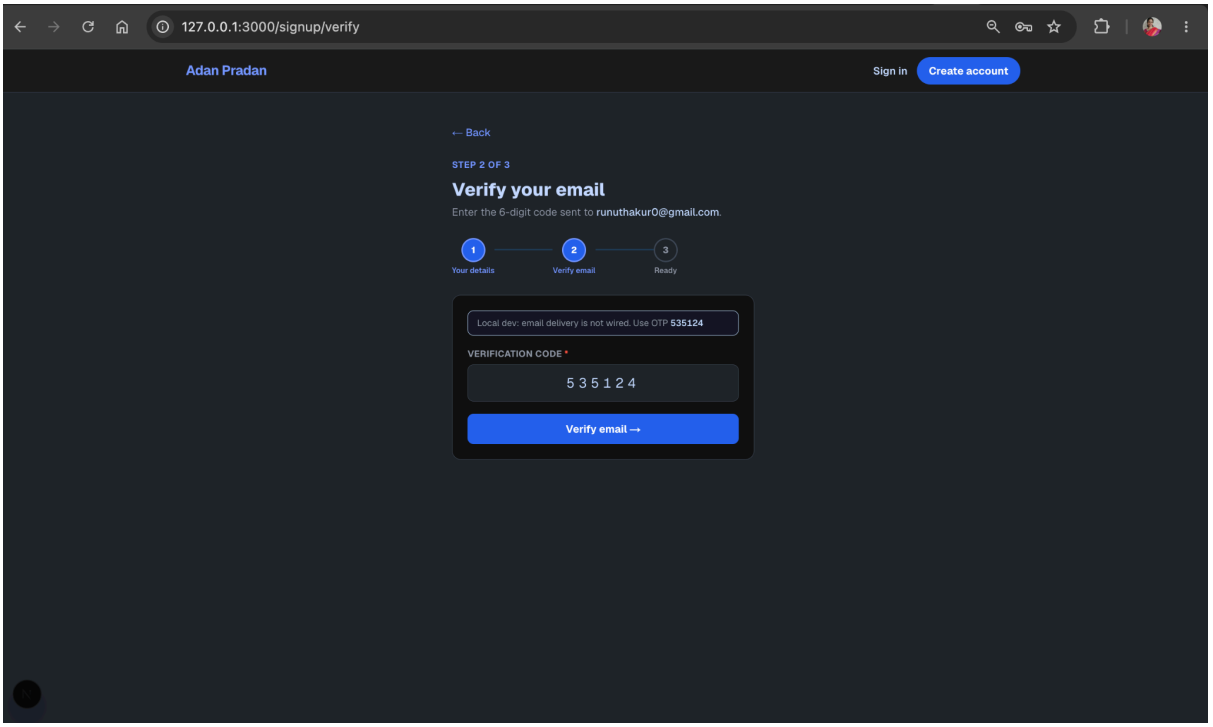

127.0.0.1:3000

"Contributors, not employees. Owners, not tenants."
Anyone who ships a plugin, integration, or service that earns revenue on this platform is a stakeholder — not a vendor subject to arbitrary platform fees, and not an employee subject to a payroll.
CONTRIBUTOR ECONOMY
How contributor rewards work
You build a plugin
ServicePlugin + PluginVersion
Tenants subscribe
Entitlement + Subscription
Usage is metered
UsageEvent + Aggregation
You earn a share
Automatic, transparent
Revenue is split transparently using the MarketplaceOffering → plan_id → PlanPricingDimension chain. The platform takes a fixed governance fee; the rest flows to contributors based on usage.
Plugin Authors
Earn from subscriptions and usage metering of your published plugin versions. More installs = more earnings. Every version you ship accrues independently.
Integration Builders
Build on top of existing plugins, add value, and resell as your own offering. The revenue chain is auditable — upstream contributors receive their share automatically.
Ecosystem Growers
Governance, documentation, testing, and community work can be tokenized and rewarded through platform decisions — not just code contributors.

GOVERNANCE
Platform principles
PRINCIPLE
WHAT IT MEANS IN PRACTICE
PLATFORM MECHANISM
Equal contribution reward
If your plugin generates $1,000 in subscriptions, your share is calculated by formula — not negotiation
PlanPricingDimension + revenue split config
Transparent metering
Every usage event is recorded immutably. No hidden aggregation or rounding
UsageEvent (append-only, idempotent)
No gatekeeping
Any verified vendor can publish. Platform governance approves for quality — not to pick winners
PluginVersion governance pipeline
Value chain auditable
When a tenant-vendor resells your plugin, the original author's share is preserved in the chain
ISVVariant revenue split + AuditLog
Contributors own history
Your plugin versions, contribution records, and earnings history are permanent — even if you leave
PluginVersion immutability + AuditLog
What we are not
✗ An employer-employee model
✗ A closed marketplace where we pick what succeeds
✗ A platform that takes 30–70% with no transparency
✗ A system where early employees earn forever
✗ A place where only corporations can be vendors
What we are
✓ A contributor-governed platform commons
✓ Open to any verified individual or organization
✓ Transparent revenue sharing by formula
✓ Metered fairly — you earn what you generate
✓ Solo founders welcome alongside enterprises
